EDUCATION

Vellore Institute of Technology, Vellore B.Tech in Computer Science and Engineering (IoT Specialization) CGPA: 8.38	2023 – 2027 Vellore, India
CBSE Class XII Science – 80%	2023 Noida, India
CBSE Class X Overall – 83%	2021 Noida, India

RELEVANT COURSEWORK

Data Structures & Algorithms, Object-Oriented Programming (Java/C++), Operating Systems, DBMS, Computer Networks, System Design Fundamentals, Cloud Computing

PROJECTS

AI Career Compass Flask, PostgreSQL/SQLite, REST APIs, Gemini API, Whisper API, Vercel - Architected and deployed a full-stack AI-driven career-prep platform on Vercel with a Flask REST backend, dual-mode PostgreSQL/SQLite persistence layer, and per-user session-based authentication. - Integrated the Gemini and OpenAI Whisper APIs to power resume ATS-alignment scoring, live audio-transcribed mock interviews with AI feedback, and adaptive code-gap quizzes across three distinct product modules. - Diagnosed and fixed a production multi-tenant data-isolation bug and a SQLite/PostgreSQL dialect-portability issue, and hardened the app with signed session keys and per-endpoint JSON error handling.	2026
Reinforcement-Learning CPU Scheduler Python, Flask, NumPy, Q-Learning, Data Structures & Algorithms - Designed a CPU process scheduler using epsilon-greedy Q-learning that selects the next process via a discretized state of relative remaining burst time and waiting time. - Implemented 4 classical scheduling algorithms (FCFS, SJF, SRTF, Round Robin) as baselines alongside the RL agent, built on a shared metrics engine comparing average waiting and turnaround time across strategies. - Exposed the scheduler and training loop via a Flask REST API driving an interactive web frontend for real-time visualization of scheduling decisions.	2024

CERTIFICATIONS & TRAINING

- DevOps, Agile and Design Thinking** – IBM Career Education Program (2026).
- AWS Cloud Workshop** – Core AWS services, cloud deployment, and architecture fundamentals.
- Java Programming Course** – Object-oriented programming, data structures, and core Java.
- AI & IoT Workshops, VIT** – Sensor-based mini-projects and embedded systems applications.

TECHNICAL SKILLS

- Languages:** C, C++, Java, Python, JavaScript, SQL
- Core CS:** Data Structures & Algorithms, Object-Oriented Design, System Design Fundamentals, REST APIs
- Web:** HTML, CSS, ReactJS, NodeJS, ExpressJS
- Databases:** MySQL, PostgreSQL, MongoDB
- DevOps & Tools:** Git, Docker, Jenkins, Kubernetes, Grafana, CI/CD, VS Code, IntelliJ
- OS:** Linux, Windows

EXTRACURRICULAR

- Active problem solver on **LeetCode** with 250+ problems solved and regular participation in weekly contests.
- Actively contribute to **open-source** and self-driven projects.
- Volunteered in the organization and coordination of multiple events in **GraVITas 2024**, VIT's flagship techno-cultural fest.
